WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/IB2004/051479

Re Item III.

1. The claimed invention involves a recording method and device for a multi-layer record carrier. The embodiments all refer to multi-layer recordable DVD (Digital Versatile Disc). No sufficiently detailed examples are given of how data is to be recorded on such a disc. The description only superficially describes structures such as "sessions", "fragments" and "hierarchical fragments". Detailed examples of these structures are completely missing. The DVD system is defined in non-public standards. No publicly available documents are known that specify how to record data on a multi-layer recordable DVD, in particular said structures.

Consequently, the description does not set forth any mode, let alone the best mode, for carrying out the claimed subject-matter relating to the recording method. Mutatis mutandis, the description does not set forth any mode, let alone the best mode, for carrying out the claimed subject-matter relating to the corresponding recording device.

Hence, the application does not fulfill the requirements of Rule 5(a)(v) and Article 5 PCT.
